Petroleum Marine Consultants, LLC
13833 Wellington Trace E4 #207
Wellington, Florida 33414

Dear Paul,

Your skills and knowledge of marine fueling systems was shown again in your successful completion of Bay Bridge Marina in Stevensville, Maryland. The most difficult part of this project was trying to connect to an existing fuel system that had had a few repairs. Your knowledge of the codes and materials was impressive and working with this difficult owner showed great fortitude.

Paul and his crew installed both phases of the replacement with great skill, completing them on budget and early. Their work ethic and knowledge showed in details of the completed system. They worked in adverse conditions which showed their dedication.

This is the second system I have worked with you and your crew and hope we will do many more.

Thank you,

Randy Ward, CMM
